

## Join the Center for Sustainable Infrastructure's Corporate Innovators Network

### CSI's Corporate Innovators Network—getting in on the ground floor

CSI is launching a new strategic partnership with leading Pacific Northwest companies who work in the sustainable infrastructure space to advance groundbreaking policies and projects, and who are growing the region into a powerhouse incubator of state-of-the-art infrastructure solutions. We are inviting the first 20 companies to join the inaugural cohort of the **CSI Corporate Innovators Network**. Join us!

We've identified your firm as one of the most innovative and forward-leaning companies in the region, and believe your company is a great fit with CSI. We'd be honored to have you as part of the ground-floor, inaugural cohort, that will shape CSI's Corporate Innovators Network (CIN) program to become a powerful force for building a thriving Pacific Northwest future.

### Help Build the thriving PNW future we want

CSI provides local infrastructure decision-makers with proven tools and cutting-edge expertise to develop innovative, locally tailored solutions that deliver bigger, broader community benefits through smarter infrastructure investment.

Leaders across the world recognize we can't stick with old infrastructure solutions that lock us into costly and unhealthy outcomes. By working together, we will create stronger, healthier, and more resilient communities.

Working with PNW thought leaders, CSI's Blueprint Reports comprehensively chart a transformative but pragmatic 20-year vision to reimagine PNW's infrastructure investment.

*CSI supports and accelerates sustainable infrastructure innovation and development in the Pacific Northwest.*

*Our mission is to catalyze state-of-the-art sustainable infrastructure solutions that help communities of every kind thrive economically, socially, and environmentally.*

### CSI's Top Priorities for 2022

CSI is working to speed our transition to a future where economic vitality, community strength, and environmental health go hand in hand in communities across our region. CSI's work takes a systems-based approach to infrastructure and economic development challenges, to forge innovative, integrated solutions that offer much greater benefits than conventional, single-solution approaches. Our 2022 projects include working to:

- Forge strategic alliances to advance catalytic policies... for Industrial Symbiosis, Value Planning, Clean Materials, and Renewable Hydrogen.
- Spearhead breakthrough projects via the CSI Innovation Lab in the next wave of 4-8 partner communities.

## CSI's New Corporate Innovators Network (CIN) - Purpose

CSI is launching a new strategic partnership with leading Pacific Northwest companies who work in the sustainable infrastructure space. The goal of the CIN is to build a powerful and informed network of companies dedicated to accelerating sustainable infrastructure solutions. CSI is forming the CIN to:

**Coalesce** a powerful voice to support catalytic policies, proven best practices, and breakthrough projects that accelerate sustainable infrastructure innovation and development in the PNW.

**Secure** financial support for CSI's capacity to host this powerful voice and advance this work.

**Elevate** CSI's visibility among businesses in the infrastructure space as the PNW's go-to 'think and do' tank for sustainable infrastructure.

**Bring** other innovative companies to the Corporate Innovators Network.

**Strengthen** CSI's impact by bringing new talent, energy, relationships, and expertise from the Network and like-minded businesses into CSI's initiatives.

CSI's inaugural CIN cohort of companies will work together to help us build a dynamic, growing movement of industry innovators, who together advance cutting-edge community infrastructure solutions, integrated economic development strategies, and smart policies that accelerate triple-bottom-line solutions to build the kind of future we all want.

### Why Join?

#### You're Invited: 2022 Inaugural Cohort

- Join with peer companies in an exclusive network of Northwest firms at the forefront of sustainable infrastructure innovation, a diverse interdisciplinary network of companies spanning key product and service categories.
- Tap this peer network to cultivate valuable new contacts, collaborative relationships, and business partnerships.
- Help shape triple-bottom-line policy initiatives and support PNW leadership in sustainable infrastructure innovation.
- Learn about leading-edge projects, ideas, and possibilities – and share your insights and expertise – at the forefront of sustainable infrastructure innovation.
- Build brand exposure and recognition as an innovation leader.
- Get in on the ground floor and help CSI build the network into an effective, high-value, growing partnership of companies.

### How does our company join the 2022 CIN Inaugural Cohort?

Each of the 20 companies in the 2022 CIN cohort will be asked to make these three commitments:

1. Assign a creative leader from your company to help shape and grow the CIN as a powerful force in the years ahead.
2. Actively support CSI's broad goals to accelerate sustainable infrastructure innovation in the Pacific Northwest.
3. Make a \$5,000 contribution as Inaugural CIN member for 2022.
